

What is a service profile

Nicky Coombes SSCRG Programme Manager, NCIN

What I will cover

- Background
- The NCIN service profile
- Next steps

Background

- The challenge
- Supporting commissioning
- Providing data for benchmarking at provider level
- Transparency

The Challenge

- Improved access to and availability of data
- Disseminating data to commissioners and clinical teams, and – eventually – the general public
- Improved patient outcomes?

Support commissioning

- One strand of commissioning support together with the service specification
- Collate a wide range of information from multiple sources in one place to support the Service Specification
- Define indicators in a well-documented and clinically robust way
- Provide site-specific information tied-in to relevant guidance

Benchmarking

- Trust level information to allow easy comparison across the providers
- Allow comparison to national benchmarks

Transparency

- Cancer Commissioning Toolkit
 - www.cancertoolkit.org.uk
- But...
 - Everyone Counts mortality data for 10 surgical specialties – published on NHS Choices
 - Lancet yesterday, Times today

The NCIN profile programme

Using information to improve quality & choice

Service profiles

- Generic indicators
- Site specific indicators "Clinical Lines of Enquiry"

FROM ROUTINELY COLLECTED DATA SOURCES

Breast Cancer Service Profile

Domain		Indicator (Rate or Proportion in brackets)
	1	Practice Population aged 65+ (% of population in this practice aged 65+)
hics	2	Socio-economic deprivation, "Quintile 1" = affluent (% of population income deprived)
grap	3	New cancer cases (Crude incidence rate: new cases per 100,000 population)
Demographics	4	Cancer deaths (Crude mortality rate: deaths per 100,000 population)
	5	Prevalent cancer cases (% of practice population on practice cancer register)
D ₀	6	Females, 50-70, screened for breast cancer in last 36 months (3 year coverage, %)
enin	7	Females, 50-70, screened for breast cancer within 6 months of invitation (Uptake, %)
scre	8	Females, 25-64, attending cervical screening within target period (3.5 or 5.5 year coverage, %)
Cancer screening	9	Persons, 60-69, screened for bowel cancer in last 30 months (2.5 year coverage, %)
	10	Persons, 60-69, screened for bowel cancer within 6 months of invitation (Uptake, %)

Data displayed are for patients for which the trust of treatment can be identified. For a full description of the data and methods please refer to the 'Data Definitions' document. For advice on how to use the profiles and the consultation, please refer to 'Profiles guidance'. Please direct comments/feedback to service profiles@ncin.org.uk

The NCIN programme

2013/14

- Sarcoma
- Head & neck
- Upper GI: Oesophageal gastric
- Gynaecology

Next steps

2014/15

- Haematology
- Upper GI HPB
- Skin
- Urology
- Central Nervous System

Haematology CLEs

- Todays Table work
- SSCRG working group

Next steps

- Developing methodologies for specialist and tertiary services
- Early discussions of composite indicators
- Meeting the needs of NHS England
- The new cancer Tsar Sean Duffy
