National Cancer Intelligence Network

# Cancer Informatics in the 'new NHS': PHE and NCIN 18 months on....

Mick Peake

Clinical Lead, National Cancer Intelligence Network

# The Health & Social Care Bill 2012: Two New Organisations from April 2013

## ■ NHS England

- “The purpose of NHS England is to use the £80bn commissioning budget to secure the best possible outcomes for patients”
- To ensure the whole commissioning architecture is in place; will also commission some services directly

## ■ Public Health England (PHE)

- Information & Intelligence to support local PH and public making healthier choices
- National Leadership to PH, supporting national policy
- Development of PH workforce
- A civil service function, not NHS

Public Health  
England

# Data Drivers

- Government

- A spotlight on the role of data and transparency

- Commissioning

- NHS Outcomes Framework

- Regulation

- New regulation framework (CQC & Monitor)

- The 'public', patients and families

- (e.g. 'Friends and family test')

# Providers of information in the new NHS

- Main sources/providers
  - Health & Social Care Information Centre (HSCIC)
  - National Audits
  - ONS
  - PHE (Civil Service)- Cancer Registries
  - NHS England Business Intelligence Teams (ATS/CSU)
- Information Intermediaries (e.g. CRUK, Dr Foster, MacMillan)

## Knowledge Directorate

- National Cancer Registration Service
- Analytical workforce from 8 registries moved into regional Knowledge and Intelligence Teams (KITs)
  - SSCRG Lead Area Work Programmes
  - Local contribution
- Health Intelligence Networks (HINs):
  - Mental Health, Maternal & Child Health, Cardiovascular & Diabetes, End of Life, **NCIN**

# Public Health England: Emerging 'Intelligence' Structures

**Public Health England  
Chief Knowledge Officer  
(Prof. John Newton)**

**Health Intelligence  
Networks  
(Prof. Brian Ferguson)**

**Disease  
Registration  
Service  
(Dr Jem Rashbass)**

**PHE Information  
Services  
Chris Carrigan**

**Knowledge &  
Intelligence Teams  
(KITs)**

**National Cancer  
Intelligence Network  
Chris Carrigan**

Public Health  
England

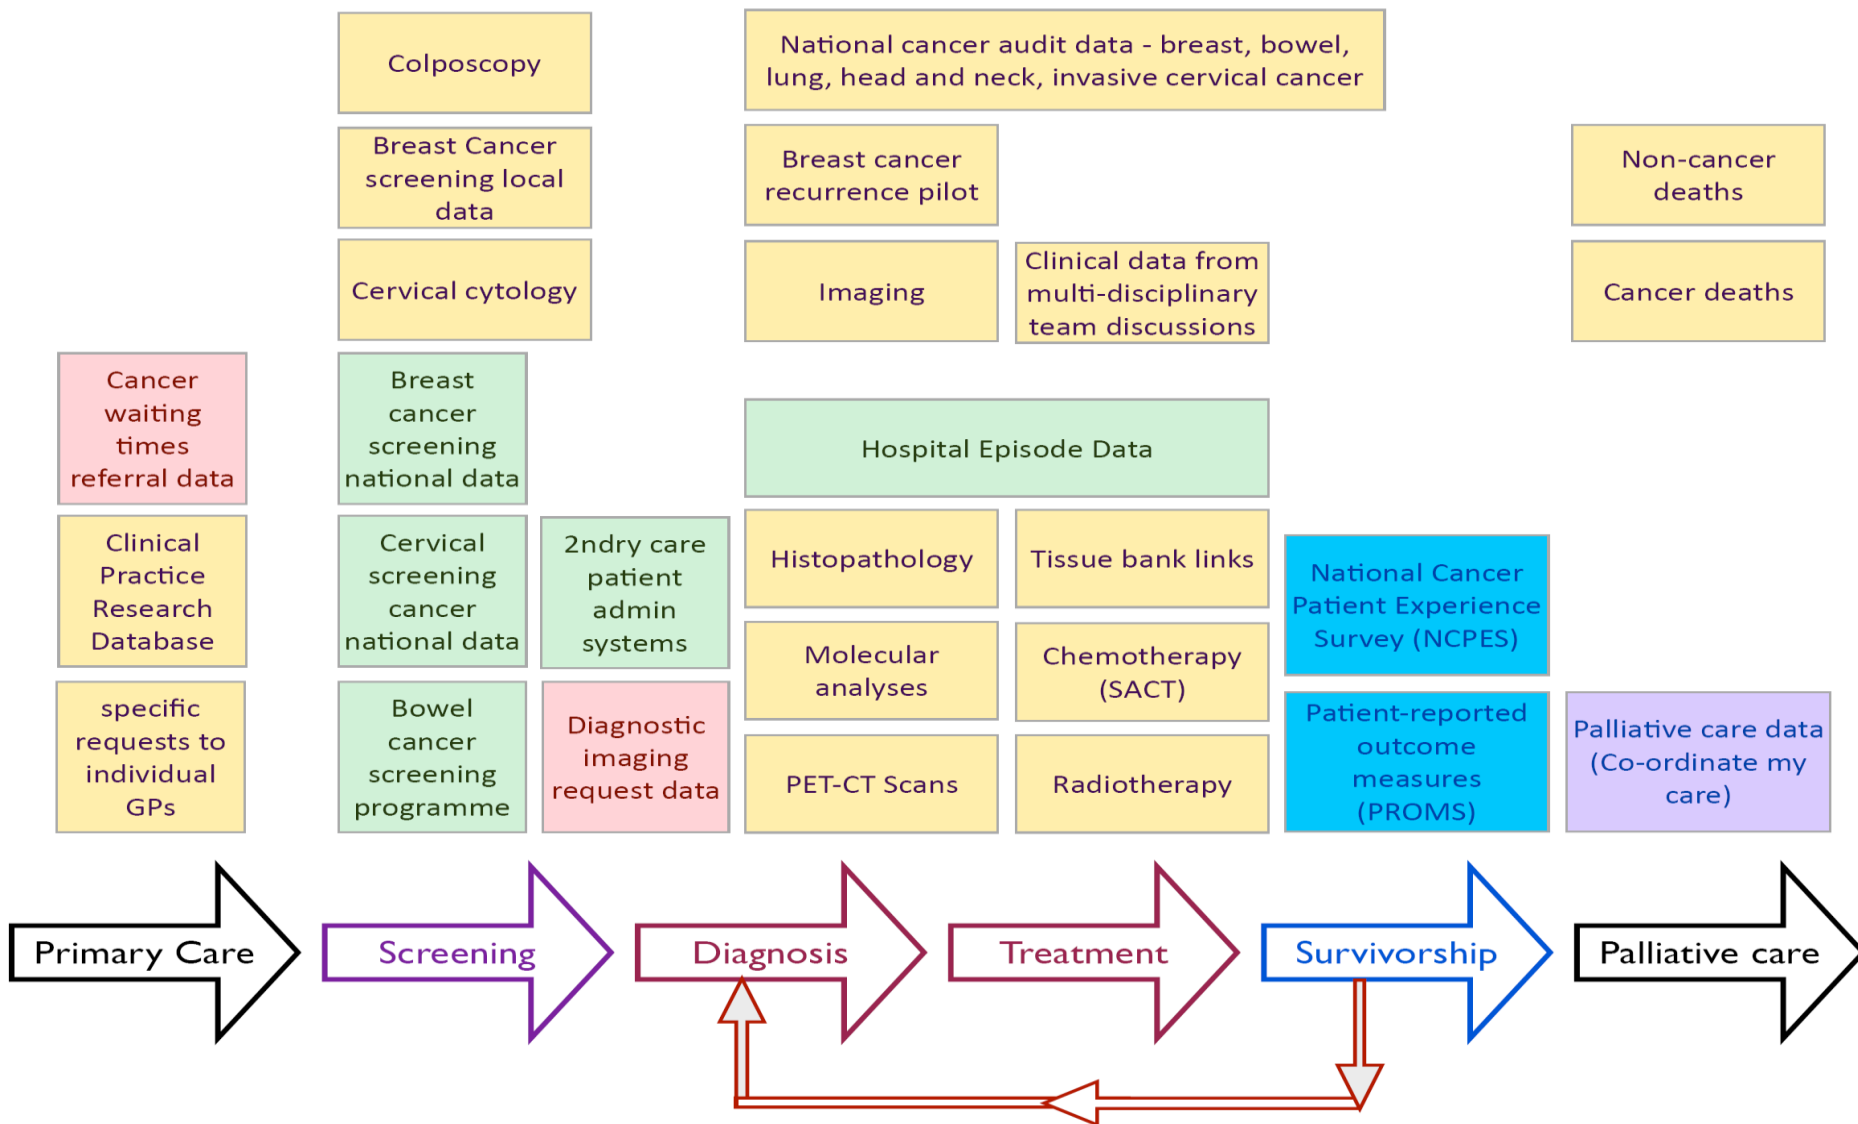

# The English National Cancer Registration System

- Comprehensive data collection and quality assurance over the entire cancer care pathway on all patients treated in England
- Single national system across England
- Routine electronic sources in registry practice
- Single integrated workforce – split off from the analytical work force
- Director of Disease Registration
- Evolving operational links with hospital leads
- Pan-England roll-out completed September 2013

Public Health  
England

# National Cancer Registration Service: Data Sources

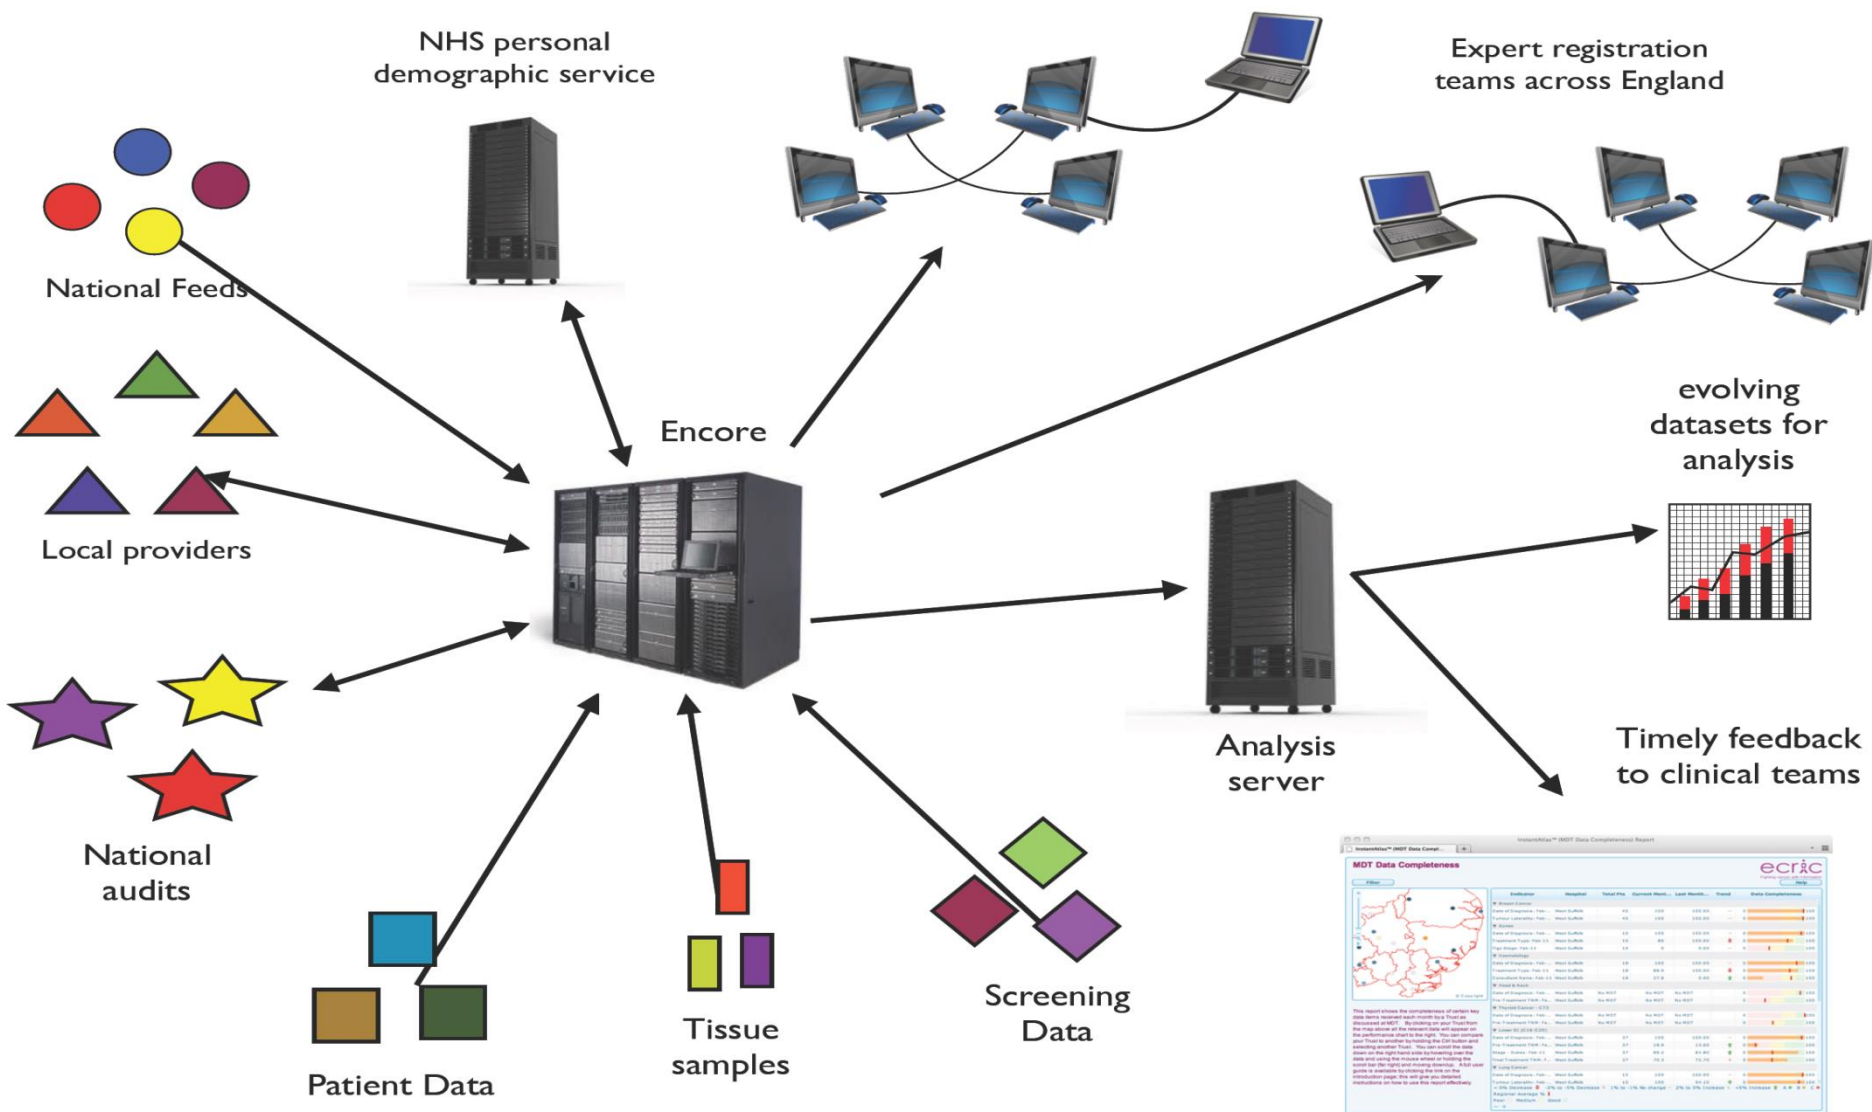

Public Health  
England

# NCRS – ENCORE

## (English National Cancer Online Registration Environment)

# NHS England – current structures

- One national office in Leeds
- 4 regions, directly commission primary care & specialist services
- 10 specialised commissioning hubs within 27 Area Teams
- 12 clinical senates – clinical advice/leadership at strategic level to CCGs and HWBs
- 12 strategic Clinical Networks (up to 5 years)
- 12 Academic Health Science Networks
- 18 Commissioning Support Units – support to CCGs
- 27 Area Teams will support CCG development
- 211 Clinical Commissioning Groups (CCGs)
- 152 Health and Well Being Boards

# Specialist Commissioning

- **National Service Specifications** (e.g. radiotherapy, chemotherapy, mesothelioma, upper GI cancer, specialised urology, surgery....)
- **Clinical Reference Groups** - 12 relating to cancer (e.g. chemotherapy, radiotherapy, upper GI surgery, thoracic surgery.....)

.....under review

# Clinical Reference Groups - cancer

- Radiotherapy – *Peter Kirkbride and Adrian Crellin*
- PET-CT - *Wai Lup Wong*
- Specialised Cancer - *Sean Duffy*
- Blood and Marrow transplantation - *Antonio Pagliuca*
- Thoracic surgery - *Richard Page*
- Upper GI Surgery - *William Allum*
- Sarcoma - *Jeremy Whelan*
- CNS tumours - *Paul Grundy*
- Specialised urology - *Vijay Sangar*
- Complex gynaecological services - vacant
- Chemotherapy - *Peter Clark*
- Complex Head & Neck - *Peter Thomson*
- Teenage and Young People Cancer - *Rachael Hough*

# NHS Outcome Framework

## 2013/14 Dashboard

### 1 Preventing people from dying prematurely

Overarching indicators	Latest data	Indicator value	Unit
1a.i Potential Years of Life Lost (PYLL) from causes considered amenable to health care - Adults	2011	M - 2,157 F - 1,700	per 100,000 population
1a.ii - Children and young people	2011	M - 616 F - 531	per 100,000 population
1b.i Life expectancy at 75 - Males	2010	11.3	period expectations of life - years
1b.ii Life expectancy at 75 - Females	2010	13.1	period expectations of life - years
<b>Improvement areas</b>			
1.1 Under 75 mortality rate from cardiovascular disease	2011	58.0	per 100,000 population
1.2 Under 75 mortality rate from respiratory disease	2011	23.5	per 100,000 population
1.3 Under 75 mortality rate from liver disease	2011	14.9	per 100,000 population
1.4 Under 75 mortality rate from cancer	2011	107	per 100,000 population
1.4.i One-year survival from colorectal cancer *	2006-2010_11	74.4	%
1.4.ii Five-year survival from colorectal cancer *	2006-2010_11	55.3	%
1.4.iii One-year survival from breast cancer *	2006-2010_11	95.5	% female
1.4.iv Five-year survival from breast cancer *	2006-2010_11	84.3	% female
1.4.v One-year survival from lung cancer *	2006-2010_11	31.6	%
1.4.vi Five-year survival from lung cancer *	2006-2010_11	9.8	%
1.5 Excess under 75 mortality rate in adults with serious mental illness	2010/11	921	absolute gap per 100,000 population
1.6.i Infant mortality	2011	4.2	per 1,000 births
1.6.ii Neonatal mortality and stillbirths	2011	8.2	per 1,000 births
1.6.iii Five-year survival from all cancers in children	Indicator to be developed		
1.7 Excess under 60 mortality rate in adults with a learning disability	Indicator to be developed		

### 2 Enhancing quality of life for people with long-term conditions

Overarching indicators	Latest data	Indicator value	Unit
2 Health-related quality of life for people with long-term conditions	Jul12-Mar13	0.73	avg EQ-5D score
<b>Improvement areas</b>			
2.1 Proportion of people feeling supported to manage their condition	Jul12-Mar13	69.3	%
2.2 Employment of people with long-term conditions	Jan-Mar13	11.6	% gap
2.3.i Unplanned hospitalisation for chronic ambulatory care sensitive conditions (all ages)	2011/12	801	per 100,000 population
2.3.ii Unplanned hospitalisation for asthma, diabetes and epilepsy in under 19s	2011/12	321	per 100,000 population
2.4 Health-related quality of life for carers	Jul12-Mar13	0.8	avg EQ-5D score
2.5 Employment of people with mental illness	Jan-Mar13	39.0	% gap
2.6.i Estimated diagnosis rate for people with dementia	2011/12	48.0	%
2.6.ii A measure of the effectiveness of post-diagnosis care in sustaining independence and improving quality of life	Indicator to be developed		

### 3 Helping people to recover from episodic conditions

Overarching indicators	Latest data	Indicator value	Unit
3a Emergency admissions for acute conditions that should not usually require hospital admission (all ages)	2011	11.3	per 100,000 population
3b Emergency readmissions within 30 days of discharge from hospital	2011	11.3	per 100,000 population
<b>Improvement areas</b>			
3.1.i Total health gain as assessed by patients for elective procedures - Hip replacement	2011	11.3	per 100,000 population
3.1.ii - Knee replacement	2011	11.3	per 100,000 population
3.1.iii - Groin hernia	2011	11.3	per 100,000 population
3.1.iv - Varicose veins	2011	11.3	per 100,000 population
3.1.v - Psychological therapies	2011	11.3	per 100,000 population
3.2 Emergency admissions for children with lower respiratory tract infections	2011	11.3	per 100,000 population
3.3 An indicator on recovery from injuries and trauma	2011	11.3	per 100,000 population
3.4 Proportion of stroke patients reporting an improvement in activity/lifestyle on the Modified Rankin Scale at 6 months	2011	11.3	per 100,000 population
3.5.i Proportion of patients with a fragility fracture recovering to their previous levels of mobility at 30 days	2011	11.3	per 100,000 population
3.5.ii Proportion of patients with a fragility fracture recovering to their previous levels of mobility at 120 days	2011	11.3	per 100,000 population
3.6.i Proportion of older people (65 and over) who were still at home 31 days after discharge from hospital into rehabilitation services	2011	11.3	per 100,000 population
3.6.ii Proportion offered rehabilitation following discharge from acute or community hospital	2011	11.3	per 100,000 population

# Clinical Commissioning Group

## Outcomes Indicator Set

**2013/14** under 75 mortality rate from cancer

- 1 and 5 year survival from all cancers
- 1 and 5 year survival from breast, lung & colorectal cancers

**2014/15 additional indicators for cancer**

- cancers diagnosed via emergency routes
- 5 year survival - children
- cancer stage at diagnosis
- cancers detected at stage 1 or 2
- 1 and 5 yr survival for lung, breast and colorectal cancers

# HSCIC Indicator Portal

The screenshot displays the HSCIC Indicator Portal interface. The top header shows the HSCIC logo and 'Health & Social Care Information Centre'. A search bar and radio buttons for 'Website only' and 'Wi' are visible. The left sidebar contains navigation links: 'Find data', 'Home', 'Tools', 'Casemix', 'Hospital E Statistics', 'Indicator', and 'Indicators'. The main content area is titled 'CCG Indicator 1.9 (NHS OF 1.4)' and 'Under 75 mortality from cancer'. It provides a detailed breakdown of the indicator, including the statistic, period, level of coverage, and source. Below this, a table displays the data for the years 2009 and 2010, categorized by gender and level of coverage.

**CCG Indicator 1.9 (NHS OF 1.4)**  
**Under 75 mortality from cancer**

**Statistic:** Directly age and sex standardised mortality rate (DSR) per 100,000, 95% confidence intervals (CI)  
**Period:** 2009 - 2012 (calendar years)  
**Level of coverage:** England  
**Breakdown:** All registered patients in England (National)  
**Released:** September 2013  
**Source:** GP registered population counts from NHAIS (Exeter), the Primary Care Mortality Database (PCMD) and ONS mid-year England population estimates

Information about the selected data item

\* Age-standardised

### Five-year relative survival estimate, males, ICD10 C61 : Prostate, 2000-2004

Relative survival is an estimate of the percentage of patients still alive five years on from their diagnosis with prostate cancer, taking into account the background mortality in the general population. It is therefore an estimate of the percentage of patients who survive their cancer for at least five years.

#### Data definitions:

Five-year relative survival estimate (%) based on people diagnosed during 2000-2004. Relative survival estimates shown above are not age-standardised.

Source: National Cancer Intelligence Network (NCIN), UK Cancer Information Service (UKCIS), accessed May 2011.

# Conclusions

- The quality and range of clinically relevant data on cancer is increasing rapidly
- High quality population-based data can clearly drive clinical behavioural change
- We now have a large and expanding clinical community engaged with cancer data
- Feedback and ongoing interaction with clinicians is an essential part of the process – peer pressure is powerful
- There is a need to improve how information is used at a local level
- The collection and intelligent use of data are at the heart of good clinical practice and commissioning

# Local Cancer Intelligence
