The National Cancer Registration Service COSD Conformance Reporting Site

Introduction

This portal has been designed to give providers of COSD cancer data rapid, quality feedback on the quality of their submissions. It allows users to look at the completeness of key data items and to conduct comparisons with local, regional and national averages to calculate relative performance.

The portal will be a continued development, incorporating useful metrics and measures with the aim of improving the quality of data flowing to the National Cancer Registration Service and ultimately, informing improvements in patient care and outcomes.

Background

The Cancer Outcomes and Services Dataset (COSD) Data Transfer Partnership Agreements (DTPAs) together with the COSD Conformance Framework provide guidance for submission of the dataset and how conformance with the COSD Information Standard is reported and monitored. Providers are expected to agree the data files that they submit for COSD in their DTPA with their local office of the National Cancer Registration Service (NCRS). The DTPA will be renewed annually. [Copies of your COSD DTPA are available from your local NCRS branch office on request]

The Framework will require on-going development to take account of other generic and site-specific data items. This will be developed in consultation with key stakeholders particularly local clinical teams and the NCIN Site Specific Clinical Reference Groups (SSCRGs)

The implementation of COSD will be managed by the NCRS directly with its data providers. The principal approach will be to work in partnership with clinicians and their information, management and multi-disciplinary teams to implement the Standard successfully. The NCRS is strengthening the resources and coordination of its Data Liaison team to make sure that there is constructive dialogue with regard to improving the timeliness and quality of data provided. However, in the event that such constructive dialogue is not having the desired effect, the Framework includes an escalation process using leverage at various levels to try to bring things back on track.

Report Descriptions

[Click headings to show descriptions...](#)

> Level 1.1

Have all the agreed COSD data files been received as per the COSD Data Transfer Partnership Agreement?

Trusts would be expected to send a monthly submission of all files agreed in their COSD Data Transfer Partnership Agreement. For a trust to be compliant with Measure 1.1, ALL the required files must have been received on time for that month. If one or more is missing or late, the trust will be non-compliant. Please refer to Measure 1.2 to see details of individual data feeds.

Level 3 Trust Reports

- Trust View - Basic
- Trust View - Advanced
- CCG View - Basic

> LEVEL 3 TRUST VIEW (BASIC)

The trust view attempts to show conformance metrics measured against an individual trust. The COSD records used for this analysis will contain details of the full pathway of the patient and it is therefore difficult to assign responsibility to a single trust for any of the metrics. To make the question of data collection responsibility clearer, the reports can be split into SINGLE PATHWAY records and SHARED PATHWAY records.

> LEVEL 3 TRUST VIEW (ADVANCED)

> LEVEL 3 CCG VIEW

Level 3 Report Descriptions

Click headings to show descriptions...

> L3.1a: Total Number of Diagnoses

SINGLE PATHWAY

These counts show patients whose complete pathway is restricted to a single trust. It can therefore be assumed that this trust would be fully responsible for the collection of all COSD data items.

SHARED PATHWAY

These counts show patients whose pathway has been partially handled by the trust, but who has also visited other trusts. At the end of the trust summary report for Level 3, there is a breakdown of the trusts which have handled the shared

Level 3 Trust Reports

- [Trust View - Basic](#)
- [Trust View - Advanced](#)
- [CCG View - Basic](#)

> LEVEL 3 TRUST VIEW (BASIC)

> LEVEL 3 TRUST VIEW (ADVANCED)

> LEVEL 3 CCG VIEW

The metrics and method of analysis is identical to the BASIC VIEW. In addition, filters are provided for all the metrics, so it is possible to combine metrics to create a customised view. E.g. by selecting "Invasive Gynaecological Cancers" in Tumour Type, "Stage 3" in stage grouping and "25-49" in age and then clicking "View Report" you will get a detailed report of Stage 3 Gynaecological cancers in the 25-49 age bracket.

Level 3 Report Descriptions

Click headings to show descriptions...

> L3.1a: Total Number of Diagnoses

SINGLE PATHWAY

These counts show patients whose complete pathway is restricted to a single trust. It can therefore be assumed that this trust would be fully responsible for the collection of all COSD data items.

SHARED PATHWAY

These counts show patients whose pathway has been partially handled by the trust, but who has

Cancer Registration - 2012

Completed December 2013

Staging Completeness 80% across PHOF
tumour sites – Prostate, Breast, Lung,
Colorectal and Ovary

Enabling national analysis that was
previously impossible

1.1% improvement per year in survival
8.8% overall – Lung Cancers

NCRS/NCIN publication
Cancer survival in England by Stage for
2012

Cancer Registration – 13/14

Stageable Cancers Report - Financial Year 2013/2014
% of Stageable Cancers - Invasive Lung Cancers

2013 complete in December 2014

2014 aim to complete in “real time” (6 months post notification of diagnosis)

Staging Completeness 80% across 11 tumour sites –

Prostate, Breast, Lung, Colorectal, Ovary, Cervix, Uterus, Lymphoma, Melanoma, Kidney and Bladder

Reports and analysis offered within a timescale that makes them clinically relevant
