## CANCERSTATS - the reporting site for the Cancer Outcomes and Services Dataset (COSD)

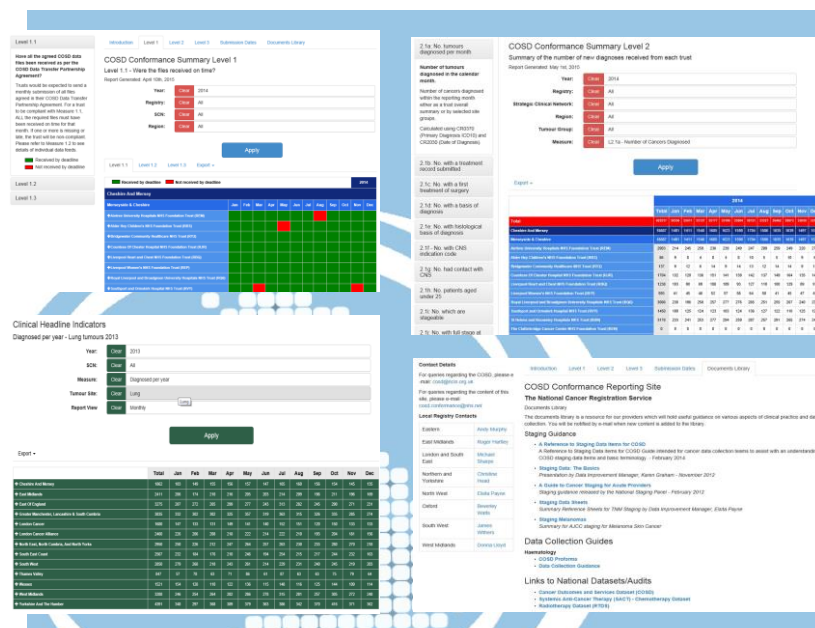

The new CANCERSTATS information and reporting portal will be the repository for all feedback on datasets which are managed or supported by the National Cancer Registration and Analysis Service (NCRAS).

Users have access to the **COSD Conformance Portal** containing Level 1, 2 and 3 reports on data submissions for COSD.

Also available on the portal is **CASCADE** - the Cancer Information Tool which provides information on incidence, survival and mortality for cancer.

Users will also have access to the National Lung Cancer Audit (NLCA) and the National Prostate Cancer Audit (NPCA) reports and shortly the Systemic Anti-Cancer Therapy Dataset (SACT) and the Radiotherapy Dataset (RTDS) will become available, as well as a wealth of supporting documentation to assist data collection in NHS trusts.

It will also offer feedback to clinical teams with the **Clinical Headline Indicator** metrics launching later in the year for all tumour sites.

## Announcing: COSD Level 3 reports for 2014 data

Complete data for the second full year of COSD (2014) is now available for analysis on the CANCERSTATS portal. Here are some of the functions available:

**Level 3 Trust Reports**  
Compare key diagnostic indicators across all of the trusts in England.

- Trust View - Basic
- Trust View - Advanced
- CCG View - Basic

**> LEVEL 3 TRUST VIEW (BASIC)**  
Analyse pathway level information for all patients in a particular trust, including a breakdown of all other trusts in England that patients visited.

The trust view attempts to show conformance metrics measured against an individual trust. The COSD records used for this analysis will contain details of the full pathway of the patient and it is therefore difficult to assign the question of data collection responsibility clearer, the reports can be split into SINGLE PATHWAY records and SHARED PATHWAY records.

**> LEVEL 3 TRUST VIEW (ADVANCED)**  
**> LEVEL 3 CCG VIEW**  
Create customised reports on a number of criteria, such as Stage Grouping, Tumour Type, Age and Performance Status.

**Level 3 Report Descriptions**  
Click headings to show descriptions...

**> L3.1a: Total Number of Patients**  
SINGLE PATHWAY  
These counts show patients whose complete pathway is restricted to a single trust. It can therefore be assumed that this trust would be fully responsible for the patient's care.

Report generated: Saturday 4 October 2014	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	Total
<b>L3.1a - Total Number of Patients</b>	26	26	31	30	26	24	34	18	26	310			
Single Hospital Pathway	10	8	12	13	13	15	9	11	9	14	8	8	130
Shared Hospital Pathway	12	12	15	13	13	16	21	15	15	20	10	18	180
<b>L3.1b - Basis of Diagnosis</b>
