

## Operational Reports Now Available

A suite of operational reports is now available, providing information on national and provider metrics. We will shortly be offering historical reporting from 2009 to 2016. The reports can be accessed by logging in at [www.cancerstats.nhs.uk](http://www.cancerstats.nhs.uk).

Full definitions for these reports and each of the metrics is available in the metrics definition document in the documentation section of the site.

## NHS England Quality Measures Dashboard

In agreement with NHS England, the Quality Measures dashboard has been suspended pending the outcome of this year's clinical review. No returns are required until further notice.

## Commissioning of New Radiotherapy Equipment

You will be able to register new machines on the API Upload & Validation Portal in the very near future. However, until this feature is live, please continue to send any new machine details to the RTDS Helpdesk.

## Thank You!

The NCRAS project team would like to thank you all for your support over the last few months. Your engagement, feedback and patience have been greatly appreciated and have contributed enormously to the success of the project. Over the go-live period 85% of trusts have uploaded their data. We are working with the remainder of trusts and expect to reach 100% imminently.

## Recruitment: Project Lead

We are seeking a Senior Project Lead to manage the project through its post-implementation phase. This role would ideally suit someone with direct experience of radiotherapy services in England. The position will be fixed term, with the possibility of extension, and we will be happy to consider a secondment arrangement. Please contact: [rachael.brock@phe.gov.uk](mailto:rachael.brock@phe.gov.uk) for more information.

### RTDS User Group

London

29th September 2016

*The first meeting of a new RTDS user group will focus on reviewing and refining RTDS reporting in CancerStats. This is an opportunity to provide feedback, suggestions and table improvements for the future. Please contact the RTDS helpdesk if you are interested in being involved. We look forward to hearing from you.*

## FEATURE PREVIEW

## Level 1 Data Reporting Available Soon

Currently in testing, this new feature will provide graphical dashboard view showing data submission status (submitted, late or none) for all radiotherapy providers.
