Head and Neck Cancers

Gabriele Price

Oxford Cancer Intelligence Unit

18 May 2011

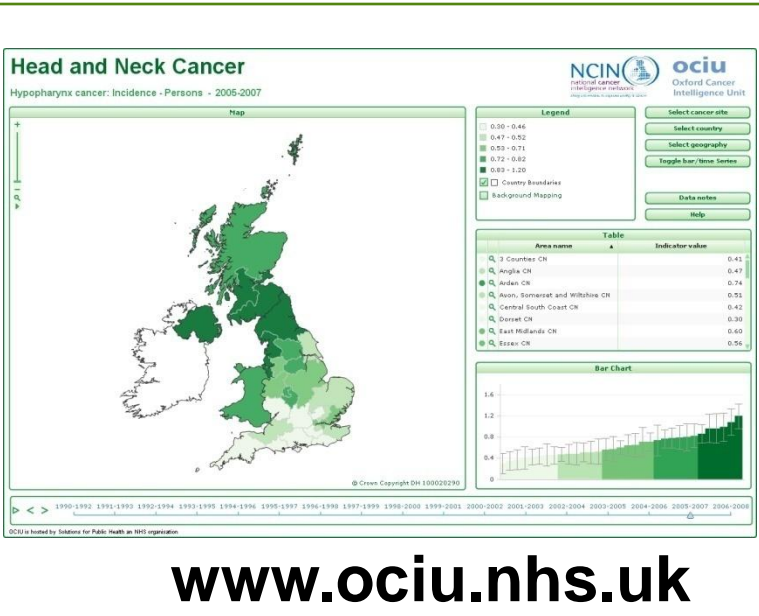

✓ The Head and Neck Cancers e-Atlas

- ✓ Profile of Head and Neck Cancers in England: Incidence, Mortality and Survival
- ✓ Oral Cavity Cancer: Survival Trends in England

✓ The Head and Neck Cancers e-Atlas

➤ Incidence and mortality

➤ 8 head and neck cancer subtypes: oral cavity, salivary glands, oropharynx, nasopharynx, hypopharynx, larynx, palate, thyroid gland

Profile of Head and Neck Cancers in England:

Incidence, Mortality and Survival

- ✓ Trends in incidence and mortality in England between 1990 to 2006
- ✓ Incidence and mortality by CN and SHA, 2002-06
- ✓ 1-year and 5-year relative survival in England, 1990-92 to 2004-06

Profile of Head and Neck Cancers in England:

Incidence, Mortality and Survival

➤ The incidence of several head and neck cancers has risen between 1990 and 2006:

- oral cavity
- salivary gland
- palate
- thyroid
- oropharyngeal

Trends in the incidence of oropharynx cancer in England, 1990–2006

Profile of Head and Neck Cancers in England:

Incidence, Mortality and Survival

- The incidence of several head and neck cancers has risen between 1990 and 2006
- Mortality from several types of head and neck cancer types has fallen between 1990 and 2009:
 - nasopharyngeal
 - hypopharyngeal
 - laryngeal

Trends in the mortality of hypopharynx cancer in England, 1990–2006

Trends in oropharynx cancer mortality in England, 1990-2006

Profile of Head and Neck Cancers in England:

Incidence, Mortality and Survival

- The incidence of several head and neck cancers has risen between 1990 and 2006
- Mortality from several types of head and neck cancer types has fallen between 1990 and 2009
- Several cancer types have shown an improvement in relative survival rates during the study period:
 - oral cavity
 - salivary gland
 - oropharyngeal
 - nasopharyngeal
 - thyroid gland
 - hypopharyngeal

Trends in 1-year and 5-year relative survival for oropharyngeal cancer in England, 1990–92 to 2004–06

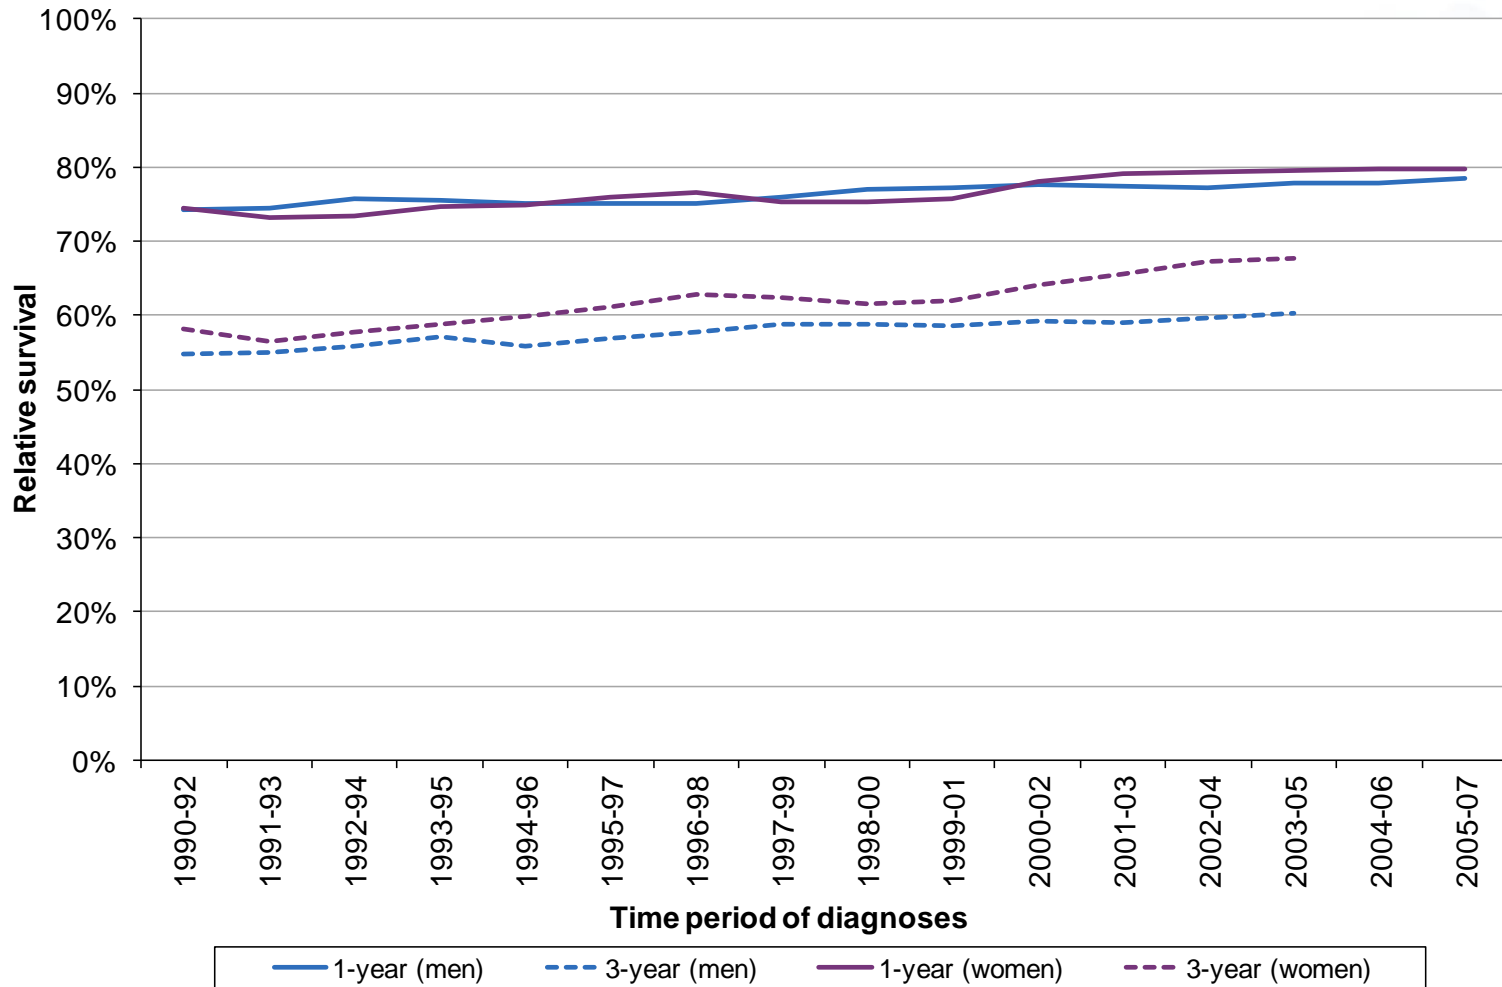

Oral Cavity Cancer

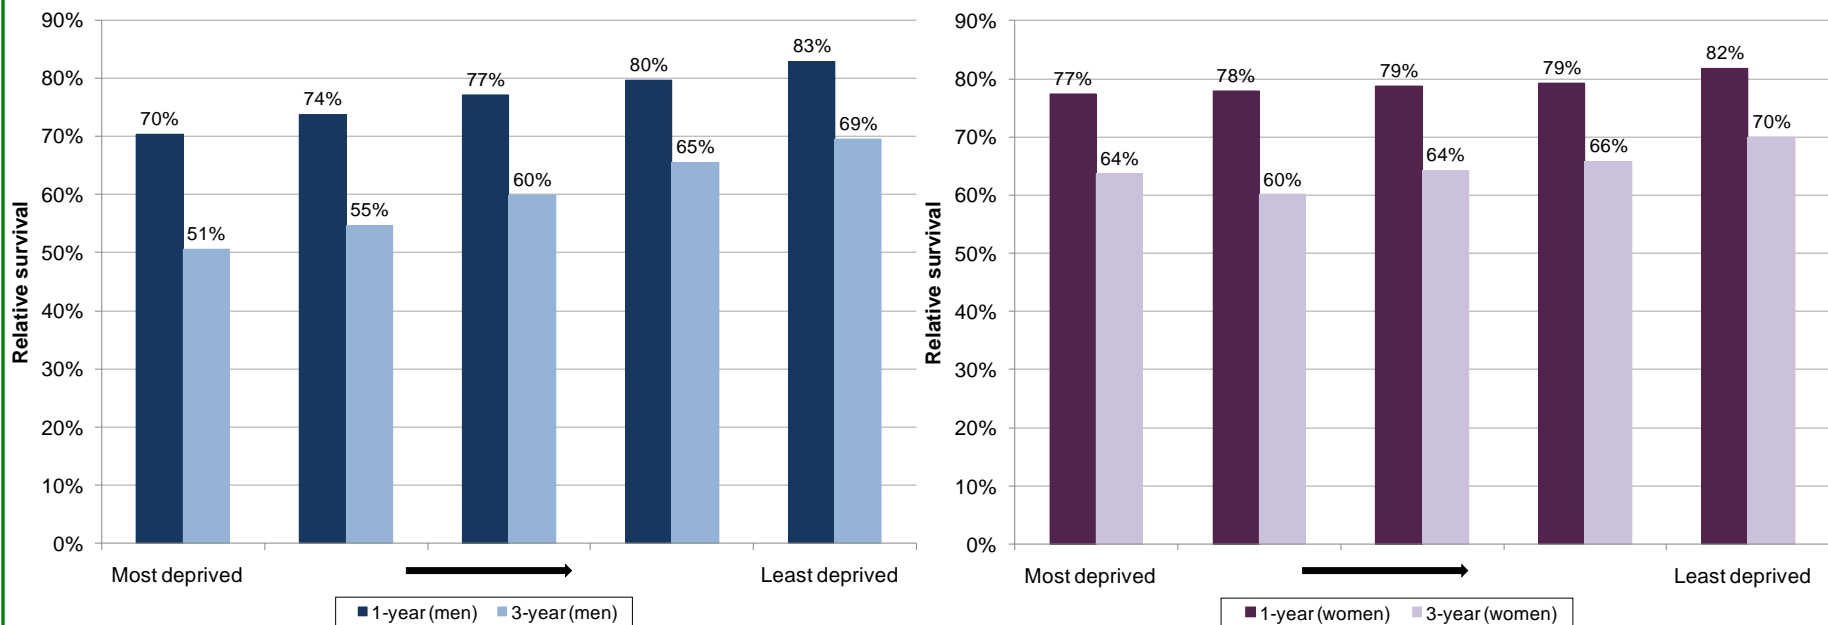

Read NCIN's data briefing
on Oral Cavity Cancer:
Survival Trends in England

- ✓ Time trends in 1-year and 3-year relative survival for men and women in England diagnosed with oral cavity cancer between 1990-92 and 2005-07
- ✓ Survival rates in men and women diagnosed in the period 2004 to 2006 across areas with varied deprivation (IMD 2007) levels

Trends in 1-year and 3-year relative survival for men and women in England diagnosed with oral cavity cancer between 1990-92 and 2005-07

1-year and 3-year relative survival for men and women diagnosed with oral cavity cancer between 2004 and 2006 in England by deprivation quintile
