

# BAUS Audit

On behalf of Section of Oncology  
Executive Committee

# The Past

- BCR (1998)
  - All patients
  - Staging
  - No outcomes
  - Limited output
  - Decreasing data quality

# The Past

- Complex operations database (2004)
  - Surgery only
  - Participation suboptimal
  - Limited follow up
  - Some modifications
  - On line data entry
  - In need of major revision
    - Relevance
    - Burden of work

# Today

- Focus on producing outcomes
  - Revise Complex Operations Database
  - Stop collecting BCR
  - STUKA
  - STORM
  - National Prostate Cancer Audit

# Complex operations dataset

- Dataset revised
  - Must have items only
  - Newer techniques included
  - Better recording of complications
  - Encourage participation and follow up

# STUKA

- One patient only
- Very detailed recording of TURBT
- 18 months ago so follow up already done
  - A snapshot of UK practice
  - Not a comparative audit
  - Closes 16<sup>th</sup> August

# STORM

- Monitoring of renal masses
  - Commonplace
  - Limited data
  - Follow up critical

# Prostate Cancer Audit

- Bid to HQIIPP led by David Neal
- Competing with other diseases
  - Dataset ?
  - MDT
  - Collection methodology?
